- 2 Maximum interval, whichever comes first,
- 3 Inspect is defined as: inspect and clean, repair, adjust, fill up, or replace if necessary.
- 4 Reset the engine oil data after replacing the engine oil regardless of the message/wrench indicator light display. It is recommended to use SAE 0W-20 engine oil for SKYACTIV-G 2.5 (Non-Turbo) and SAE 5W-30 engine oil for SKYACTIV-G 2.5T (Turbo).
- 5 Inspect spare tire if equipped.
- 6 According to state/provincial and federal regulations, failure to perform maintenance on these items will not void your emissions warranties. However, Mazda recommends that all maintenance services be performed at the recommended kilometre period to ensure long-term reliability or when the onboard vehicle status monitor indicates service is due to ensure long-term reliability.
- 7 Use only Mazda Genuine Spark Plugs. Spark plug replacement should be only performed by a trained Mazda technician, not by a vehicle owner.
